The more information we received about your feed or its ingredients, the more targeted we can identify the decisive GMO varieties after a positive screening result.

Your sample will be processed according to the current specifications of the VLOG standard / GMP + standard (or equivalent standards). These standards also provide the procedure / necessary follow-up analysis after a positive screening result. Accordingly, after a positive screening result, our customer service automatically arrange all necessary follow-up analyses without further consultation.

We refer to our general terms and conditions which can be found on the internet: <http://www.agrolab.com/de/agb.html>. Please note that our reports may contain a "disclaimer" clause as forced by accreditation norm in case of an observation for inappropriate sampling, packaging or transport conditions that might have any influence on the reported analytical results. We reserve the right to perform and charge for any necessary, additional preparation steps if required by matrix or parameter combination without prior notice.
