AGROLAB GROUP

Your labs. Your service.

Food Analysis

Quality. Safety. Expertise.

AGROLAB is your reliable partner for state-of-the-art food analysis. The quality, safety and authenticity of your products are largely determined by the raw materials used and how they are processed. Using advanced, accredited analytical methods, we make these characteristics objectively measurable and precisely controllable – an essential foundation for product safety, consumer protection and marketing in compliance with the food law.

Our independent testing laboratories deliver robust results – quickly, cost-effectively and in accordance with recognised standards. Whether it's ingredients, declared values, vitamins or specific issues: we carry out targeted analyses tailored to your individual requirements. Our dedicated contacts support you throughout the entire supply chain, from agricultural production through industrial processing to retail placement.

Your benefit:

Accredited and recognised testing bodies (e.g. BNN, QS, Fruitmonitoring)

Internationally recognised analysis reports

Qualified and dedicated staff

Personal points of contact in the laboratory

Regional sales support

Comprehensive quality assurance

Smart IT solutions for efficient processes

Support with risk-based testing plans, including marketability assessments

Convenience with ALOORA: placing orders, real-time results and archive access

Our scope of analytical testing:

Nutritious food ingredients

- ▷ Nutritional values
- ▷ Vitamins/vitaminoids/provitamins
- ▷ Minerals/trace elements
- ▷ Amino acids

Undesirable substances

- ▷ Heavy metals
- ▷ Pesticides
- ▷ Halogenated persistent organic pollutants (dioxins/PCBs, PFAS, ...)
- ▷ Process contaminants (PAHs, 3-MCPD, acrylamide, ...)
- ▷ Mineral oil residues (MOSH/MOAH)
- ▷ Plant toxins
- ▷ Mycotoxins
- ▷ Allergens
- ▷ Microbiological testing
- ▷ Radiochemical analyses

Further analyses/services

- ▷ Declaration/labelling checks
- ▷ Marketability reports
- ▷ Sensory evaluation
